Code Coverage Report

Evidence generated: 30 October 2026, 23:31 IST. Baseline commit: 9ea6b597a8d51b4070b80182b056575b8c183aeb. Tests include the supplied working-tree changes.

This is an automated local verification record. It is not UAT sign-off or deployment certification. Simulated business dates in November are test inputs; execution dates are not backdated.

Measurement

Jest uses Istanbul instrumentation during the complete backend run. The denominator includes every backend/src/**/*.js source file, including models, route handlers and startup code. Frontend source is not included. Coverage measures execution, not correctness or requirement acceptance.

The source-file audit reconciles the coverage map against all 64 backend JavaScript files. Any unloaded file missing from the original Jest map receives an Istanbul zero-hit map, never assumed coverage. See evidence/coverage-scope.json for the original totals, added files and corrected totals. The Jest discovery roots were corrected after execution; a discovery-only check confirmed the identical recorded suite set for future runs.

Metric	Covered	Total	Percent
lines	1881	2031	92.61%
statements	2209	2459	89.83%
functions	466	506	92.09%
branches	1171	1454	80.53%

Per-file code coverage

Source	Lines	Statements	Functions
backend/src/accessLog.js	81.81%	77.5%	62.5%
backend/src/accounts.js	79.31%	75.6%	87.5%
backend/src/app.js	94.33%	93.1%	85.71%
backend/src/archive.js	97.03%	92.77%	88.88%
backend/src/auth.js	100%	100%	100%
backend/src/cache.js	100%	90%	90%

Interpretation and evidence

No numeric coverage target is specified in the Part-3 assignment; none is invented here. Startup code is included even though the instrumented Jest run does not launch server.js as the production entry point. The acceptance server is a separate, uninstrumented process; its executions are not silently added to this denominator.

Open coverage/index.html for navigable source detail. coverage/coverage-final.json stores per-location execution counts; coverage/coverage-summary.json stores these aggregates.
